Motion to Intervene on FE Docket No. 14-179-LNG

Filed February 9 2015

Pursuant to 10 C.F.R. 590.303, I herein file this motion to intervene in the Docket 14-179-LNG.

In opposition, I state as follows :

I am an impacted resident living in Delaware County New York less than 50 miles from frack gas extraction wells and near the existing and proposed northeast network of interstate gas transmission corridors that would feed into pipelines used by Pieridae to export fracked gas. In particular I live less than 7 miles from the proposed (and absurdly named) "Constitution" and "NED" pipelines, both of which are identified by Pieridae as potential sources of transportation capacity to serve this project.

I am also a citizen who would be impacted by the regional environmental degradation, inflated gas/electric rates, and degradation on grid reliability, that will result as a consequence of this project.

For the reasons stated above, I respectfully requests that DOE/FE grant this timely motion to intervene and that I be accorded full party status in any proceedings held by DOE/FE in this docket.

Name:
Mark Pezzati
