- I am an impacted citizen and will be impacted by the regional environmental degradation, impact on gas/electric rates, and impact on grid reliability, that will result as a consequence of this project. As a citizen I will also be adversely affected by the change impacts of this project. I am opposed to this project.

This project is not in the public interest. This permit application must be evaluated based on the full life cycle of the gas from extraction, processing, transportation, shipping, liquefaction, re-gasification, and consumption.
