Subject: 14-179-LNG Comment
Date: Sunday, February 08, 2015 6:06:47 PM

Dear Sirs,

Please deny Peridae Energy's application to export domestically produced natural gas (FE 14-179-LNG). The supplies for this will be partly provided by natural gas pipelines proposed by Kinder Morgan and Tennessee Gas, a Kinder Morgan subsidiary. This pipeline will be responsible for a private company using our federal government (FERC) to take peoples land and property by eminent domain. This was never the original intent of eminent domain laws in our country. Kinder Morgan will reap great profits from this pipeline supply and have the rate payers of New England pay for their own private expansion. There is no public benefit to any citizen in New England for exported gas, only a loss of property and a higher power bill.

Again, I urge you to deny this application.

Sincerely,

Thomas Wilder
