Subject: FE Docket No. 14-179-LNG
Date: Monday, February 09, 2015 1:47:56 PM

I am writing to request that you extend the comment period for FE Docket No. 14-179-LNG. I just learned of this over the weekend, and I think such a serious matter as allowing export of gas for 20 years needs close scrutiny.

Some of this gas coming from United States would be sources from shale gas obtained through hydraulic fracturing. This type of extraction is extremely risky to the water supply. Once we damage our water supply, it is not necessarily easy to restore it. The risk we incur in order to obtain this gas which would flow through the M&N pipeline to this export terminal is NOT in the public's best interest.

Increasing our exports of natural gas is goes against the best interest of American people. We can not afford to export carbon-producing gas at a time when we should be reducing our carbon output in order to slow down climate change. If we export gas, we then lose control over how it is used.

Therefore, I request that you extend the comment period for FE Docket No. 14-179-LNG (Pieridae Energy (USA) Ltd.; Application for Long-Term Authorization To Export Domestically Produced Natural Gas Through Canada to Non-Free Trade Agreement Countries After Liquefaction to Liquefied Natural Gas for a 20-Year Period).
