

BioenergizeME

Infographic Challenge

Understanding America's Bioenergy Choices

Take hold of your energy future:

The Energy Department challenges you to investigate a bioenergy topic and design an infographic that illustrates your research.

Bioenergy is derived from organic matter to produce renewable fuels and power. This national challenge aims to inspire students to explore America's bioenergy choices and share what they learn with others.

The Energy Department's Bioenergy Technologies Office is sponsoring this competition, and a panel of bioenergy experts will judge submissions.

Submissions are due by March 20, 2015.

Follow the hashtag **#BioenergizeME**.

HOW TO WIN

- Assemble a # BioenergizeME team
- Research a #BioenergizeME topic
- Design a creative and innovative #BioenergizeME infographic
- Submit to OPERATION #BioenergizeME.

AWARDS

The Energy Department will reward winning participants by

- Promoting the infographics on a government website
- Recognizing the first-place infographic at a national event
- Recognizing all finalists with official letters.
