PLAINS & EASTERN  
CLEAN LINE

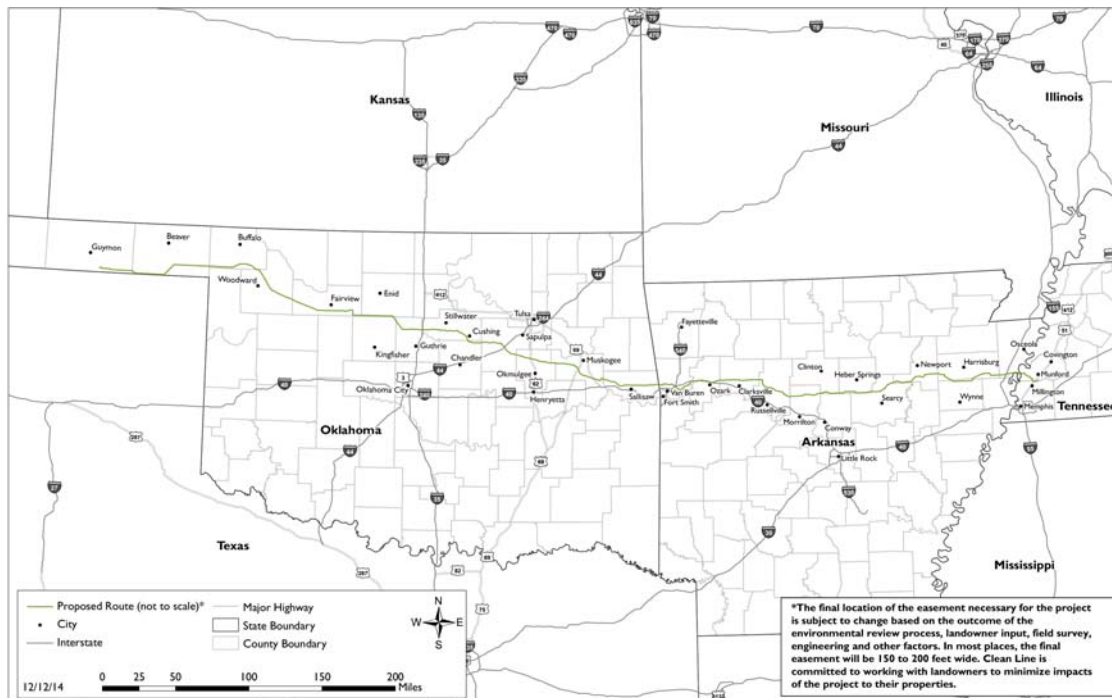

## PROJECT UPDATE

### DRAFT ENVIRONMENTAL IMPACT STATEMENT RELEASED

I know that this is a busy time of year, but I would like to give you a quick update on a major step forward for the Plains & Eastern Clean Line transmission line project. A few days ago, the U.S. Department of Energy (DOE) released for public review and comment the Draft Environmental Impact Statement (EIS) for the proposed project pursuant to the National Environmental Policy Act (NEPA). We are pleased with the quality and depth of the information presented in the Draft EIS. Stakeholders can now review the proposed location of the HVDC line and other project facilities, study the analysis of the potential environmental effects of the proposed project and alternatives, and make comments on the document to DOE. DOE has not made a decision regarding the Plains & Eastern Clean Line at this time. For more information on the NEPA review process, to view a copy of the Draft EIS, and learn how to participate in DOE's comment process please visit DOE's Plains & Eastern EIS website at [www.PlainsAndEasternEIS.com](http://www.PlainsAndEasternEIS.com).

As you may recall, the Plains & Eastern Clean Line is an approximately 700-mile overhead high voltage direct current (HVDC) transmission line and associated facilities that will be capable of delivering enough affordable wind energy from the Oklahoma Panhandle region to power more than one million homes in Arkansas, Tennessee and other states. The Plains & Eastern Clean Line means investment, jobs and cleaner energy for communities that host the project. Clean Line is not seeking federal funding for the project. You can learn more about the project by visiting our [www.PlainsandEasternCleanLine.com](http://www.PlainsandEasternCleanLine.com).

Below is the proposed route for project. Please click on the map to see more details on the proposed route, including a link to an interactive map.

Getting to this stage in the development of the project involved a multi-year process that included input from thousands of stakeholders and a tremendous amount of analysis and thought. You can see more information on the routing process [here](#).

Clean Line is committed to compensating landowners fairly and working cooperatively with them to minimize impacts to agriculture or other uses of their land. For more information on Clean Line's compensation for landowners, please visit our [Oklahoma](#), [Arkansas](#) and [Tennessee](#) landowner information pages.

If you have any questions or concerns about the project, please call us toll-free at (877) 573-2851 or email us at [info@plainsandeasterncleanline.com](mailto:info@plainsandeasterncleanline.com). A project representative will respond to your inquiry.

Thank you, and I hope that you have a safe and restful holiday season.

Mario Hurtado and the Plains & Eastern Clean Line Team
