Subject: PLAINS & EASTERN CLEAN LINE TRANSMISSION LINE - PART 2 APPLICATION
Date: Wednesday, June 10, 2015 3:01:54 AM

Dear Dr. Moniz,

I am concerned about the Non-NEPA Section 1222 review for Clean Line Energy Partners, LLC's proposed Plains & Eastern High Voltage DC transmission line.

The Comment period does not provide adequate time to review Clean Line's application in its entirety; therefore, I am requesting an extension of the comment period. A project of this magnitude and complexity requires a comment period that allows ample time for all interested parties to analyze the application and provide informed feedback.

This application with the materials and appendices was not presented to all interested parties (landowners and the general public), and the Department of Energy has not provided an explanation of the process and criteria that will be used in a formal, transparent setting to review and make a determination on this proposed project.

Public hearings are needed to comment on this application as was done with the Draft EIS. Following a formal, open process is probably more important for this application than for the EIS.

Please schedule public hearings as soon as possible and provide widespread notice to the public.

Thank you for considering this request.

Kenneth E. Stone
