Subject: PLains and Eastern Clean Line transmission line Part 2 Application
Date: Wednesday, June 10, 2015 11:06:17 AM

The State of Arkansas after examining Clean Line project on behalf of the people of their State denied the application of right of eminent domain. (Iowa, Illinois,, Missouri, have also denied Clean Line the right of eminent domain).

The Federal government was created by the States, not the other way around. What the States decide must be respected.

The people of the States that have rejected Clean Line request of right of eminent domain understand the burden this will cast its citizens, financially, health wise, and destroy valuable agriculture soil in perpetuity. This project, as their other that are collecting huge Federal incentives, is not best for national interest.

No matter how many pages of papers, Google maps, hours of talk, it all boils down to private rich investors are speculating on Federal taxpayers hard earned dollars, to increase their self projects.

Thank you
