**Subject:** I support the Plains & Eastern Clean Line

I have signed many petitions supporting clean energy and I give a big thumbs up to Plains & Eastern Clean Line and hope it is allowed to grow and reach my part of the country. If we continue to deplete our planet of its natural resources in the foreseeable future there will not be any left and if we do not develop our ability to produce clean energy we as a people will be left facing a crisis we will not know how to deal with because we did not develop this technology.
