Subject: I support the Plains & Eastern Clean Line

To whom it may concern

I am an avid opponent of natural alternative energy. History has shown humans progress throughout the ages, through the Bronze era, the Copper and Steel. Eventually old methods fall out of the way and new better ones come in. Using natural gas and petroleum as energy sources is OUTDATED. We need to catch with the times otherwise Mother Earth will have no more time left. Please support this project and other things like solar energy, wind energy, hydroelectric etc.
