Subject: Clean line is desperately needed
Date: Friday, June 12, 2015 10:13:01 PM

Arkansas needs to ween itself off of fossil fuels and this is a first step since it is a conduit for wind power. If this was an oil pipeline, you wouldn't see one Arkansas rep or senator opposing it. A power line is not pretty to look at, but it's much better than an eventual spill. It also is much better than the particulate matter that we breath in daily from the coal plants in Arkansas and Texas.

It's a no-brainer.
Sincerely,
Matthew Bintliff
