Subject: Transmission Line

I wish to express my opposition to the proposed Plain & Eastern Clean Line transmission line.
I see no reason why we should act as a mere corridor for Oklahoma to sell power to Tennessee.
I'm sick of hearing about all the jobs such proposed projects will create.
We are not stupid and we've been sold down this road before.
Many of these construction companies are from out of state and these are temporary construction jobs.
We would be left with these ugly towers across our beautiful state.
If Tennessee wants alternative energy, let them build their own wind and solar plants.
