---

Construction of the PECL will cause considerable harm to property and small business owners, many which are my neighbors, all along the proposed line, and will outweigh any possible benefits of the line. I am opposed to the construction of the line, and ask that you not favorably consider their request for eminent domain. The line will pass within one mile of property owned by myself, which I live on, and family members. This power source could just as easily be placed in Tennessee as Oklahoma. All it will do is make a few people very rich at the expense of the land owners.
