The DOE needs to deny the application of Plains and Eastern Clean Line. It is not needed and is not good for Arkansas.

United States Senator Tom Cotton said, "I have concerns regarding the use of eminent domain and believe such a power should be granted only in cases which benefit the communities impacted by its use.." None of the farmland this would pass through would benefit. He went on to say, "The announcement that Clean Line will consider revising their route to provide additional power capacity in Arkansas does not alter my stance – I will continue to monitor the actions taken by Clean Line, the Arkansas PSC, and the Department of Energy..."

Sincerely,
