DOE

I'm writing to express some of my concerns about wildlife that would be affected by this PowerLine project. Just on my family's farm we have hoot owls screech owls bats many species of birds deer turkey and as of this year black bear. By my research a PowerLine of this magnitude will play havoc on the wildlife pushing it away. We have worked very hard to keep the balance of wildlife and stock so they both will thrive in hand. Between the clearing and the radiation this line will put off it will have a negative impact on both. So I urge you to decline this project.
