

# BIOENERGY IMPACTS

The bioenergy industry is creating new career opportunities

The Bioenergy Technologies Office is supporting the research, development, and demonstration of advanced technologies that are creating new opportunities for the U.S. workforce. Energy Department funding is helping to commercialize ethanol from non-food plant sources and “drop-in” biofuels (can directly replace gasoline, diesel, and jet fuel) for use in vehicles and airplanes—contributing to new jobs and economic growth.
