To the U.S. Department of Energy,

I am writing to express my objection to the LNG export proposal put forward by Pieridae Energy, under FE Docket No. 14-179-LNG, seeking approval to export natural gas using the M&N pipeline. Thus export proposal is not in the public interest as it will 1) expose our domestic energy markets to global competition, driving up natural gas prices, lowering our supply available for domestic use, and ultimately weakening the American economy, and 2) undermine America's leadership role as a global leader in the battle to reduce greenhouse gas emissions.

As this comment period was not widely announced, we have only learned of it this weekend, I would respectfully request an extension of time for others to comment and intervene in this proposal.

Sincerely,

Denene M. Premus
