Central Council Tlingit Haida
Indian Tribes of Alaska

Tlingit Haida Regional Housing Authority
Tribal DOE Programs

1. Alaska Native Weatherization Training Program

2. Low-income Multifamily Energy Efficiency Building Audits
Alaska
Alaska State Legislature Funding
Weatherization Program

Senator Lyman Hoffman, Bethel Alaska
Wife Lillian and children; Madilyn, Elizabeth, Karis, Bethany and Douglas
State of Alaska Weatherization Program

- Wx Workers needed for State of Alaska WAP – THRHA
- Funding limited for homes on the road system
- Training funds limited
- Unemployment rate high in Rural Alaska
Alaska Native W x Training Program
DOE Tribal First Steps

Objectives
• 50 Trainings
• Wx Training Units
• 25 paid OJT
• Wx Audits Rural Homes
• Wx Rural Homes
• Strengthen Tradition and Native Culture
• Reduce Consumption and costs

Accomplishments
• 52 Trainings
• Installer, Crew Chief, and Auditor Training - UAS
• 25+ OJT Positions
• 300+WX Audits and Homes Weatherized
• Native Elder Participation
• Energy consumption and Costs Reduced
Alaska Native WX Training Program
Training House
Alaska Native WX Training Program
Building Energy Retrofit Technician

- 40 hour training
- Introduces job readiness & material installation techniques
- Classroom & hands-on experience
- Topics:
  - Buildings as a system theory
  - Air sealing materials & applications
  - Insulation products & methods
  - Basic blower door
- BPI Building Analyst approved certification curriculum
Alaska Native WX Training Program
Classroom + Field Lab
Alaska Native WX Training Program
Blower Door Training
Alaska Native WX Training Program
Understanding Unplanned Airflows
Alaska Native WX Training Program
Combustion Safety
Alaska Native WX Training Program
Ventilation Flows
Alaska Native WX Training Program
Airsealing

The Global and U.S. Energy Picture
- What is Uncle Sam doing? Why an increased focus on community energy development is increasingly important at this time.

Geography of Strategic Energy Planning
- What do we mean by Community Energy?
- The value of local energy self-reliance. The elements of community energy development and community energy planning.
- A working session focused on self-identification of an energy vision, energy needs (demand), energy supply options, and approaches to implementation. Current energy providers, local energy supply options, forecasts—
- how is your community energy demand going to change in the future?

Developing an Energy Vision

Tribal Community Strategic Energy Planning
Rich Stromberg: “From my perspective, each community needs to grow its own effort with passionate local champions who will find ways to get things done regardless of the obstacles.

The most successful groups have gone through their own local forming and storming stages.

They have a broad representation across the community of varying and competing interests.

They are self-led and tell the government what they need and how they are going to execute on their plan.”
Alaska Native WX Training Program

- Outreach & Awareness
- Education
- Community participation and solutions
- Power of reducing energy consumption
- Cost Saving - Home Energy Efficiency
Alaska Native WX Training Program
Outreach & Awareness
AHFC Presentation
Betty Hall
Energy Information Specialist
2010 Tribal Energy Review

Learning from Others / Planning:

• Reduce energy consumption by Tenant behavior “Energy Wise”

• Reduce costs by finding solutions to reduce the cost of tenant heat and utilities

• Assist Tribal Members with energy issues in their community to become self-sufficient, energy sovereign, by limiting high-cost imported energy resources.
Tribal DOE Programs

• Alaska Native Weatherization Training Program
• Next Steps:

• Low-income Multifamily Energy Efficiency Building Audits
Low-income Multifamily Energy Efficiency Building Audits

Objectives

• Decrease energy demand by increasing energy efficiency for low-income multifamily buildings

• Reduce household energy consumption through energy conservation education and energy upgrades

• Project energy savings based on fossil fuel reduction to environmentally and economically benefit Tribal southeast communities.
Low-income Multifamily Energy Efficiency Building Audits

- 50+ comprehensive EE audits, monitoring, and usage assessments on low-income multifamily buildings in 14 southeast Alaska communities

- Identify cost effective feasible weatherization options for building retrofits that can reduce energy consumption by 30% or more.

- Determine funding for buildings based on feasibility recommendations for energy upgrades/retrofits
Low-income Multifamily Energy Efficiency Building Audits

- Local weatherization crew members trained to complete multifamily building energy audits

- Wx audits will produce comprehensive project plans sufficient for funding applications and implementation of multi-family energy efficiency measures
Reduce Energy Consumption
Energy Wise Program

• Provide energy conservation education and energy use monitoring for 400 rental tenant families.

• Develop and provide tenant education and training specific to household behavior and reduce tenant energy consumption.
Home Energy Conservation

- The cheapest kilowatt of electricity is the kilowatt you never have to use.

- Efficient appliances, low-watt lighting and weatherproof buildings cut costs.

- These are the fastest and least-expensive solutions to implement.
Reduce Energy Consumption

Energy Wise Program

- 28 field assessors trained to conduct home energy assessments
- 14 community meetings / Energy Fairs completed
- Field and maintenance staff trained to install energy usage monitoring equipment and maintain energy efficient devices
- 400 in-home energy consultations, community members receive energy efficiency and energy demand reduction education and training
