Established in 1869, the Fort Belknap Reservation is the home to two distinct Northern Nations, the Gros Ventre and the Assiniboine tribes. The reservation is located in north central Montana about 36 miles from the Canadian border. Fort Belknap was established in 1869 near the present town of Chinook, Montana. The new fort served as a trading post and became the government agency for the Gros Ventre and Assiniboine Indians living in the area. On May 1, 1888, a congressional act set aside the land for the Fort Belknap Reservation. Later that year, the agency moved from Chinook to its present location five miles east of Harlem, on the northwest corner of the reservation.
The Fort Belknap Indian Reservation is located in north central Montana near the town of Harlem. Its northern border runs along the Milk River generally north of US Highway 2 for a distance of about 32 miles. State Highway 66 bisects the reservation on the west side from the Blaine County / Phillips County line (the south border of the reservation) north to US Highway 2. The reservation is approximately 28 miles wide in the east/west direction and approximately 37 miles long in the north/south direction. The total land area of the reservation is approximately 1,011 square miles. Most of the reservation is located in Blaine County, while the eastern most five miles are located in Phillips County.
Project Overview

Recognizing that Montana ranks fifth among all states in wind energy potential, the Applicant has chosen to investigate the opportunities for wind energy development on the Reservation. Previously, on November 6, 2002, the Applicant installed a 20 meter meteorological tower in the northwest portion of the Reservation. That installation was accomplished with equipment on loan through the National Renewable Energy Laboratory ("NREL") Equipment Loan Program and with advice from the NREL staff.
Project Overview

Contracted with Distributed Generation Systems, Inc. (“Disgen”) of Lakewood, Colorado to assist in the preparation of the DOE application and to conduct the Study in cooperation with the FBICC’s staff.

Install a new 50 meter meteorological tower in the northwest portion of the reservation, move the existing 20 meter meteorological equipment to a location near an elementary school in the community of Lodgepole, in the southern portion of the reservation and to install meteorological equipment on a communications tower near Route 66 in the center of the Reservation.
Fort Belknap Indian Community

Project Participants

- Fort Belknap Indian Community Council
- FBIC Transportation Planning Department
- FBIC EPA
- Disgen Native American Programs and Resources (Cost Sharing Partner)
- Meteorologist Ed McCarthy
Objectives

The Study’s objective is to fully evaluate the Reservation’s potential for wind energy development both for use on Reservation and for export off Reservation. In addition, the FBICC’s seeks to evaluate the potential for wind/electric water pumping and modern wind/mechanical water pumping systems for remote areas of the reservation and for wind/hybrid systems that may be used on Reservation in ways that may assist the Applicant in managing its energy costs.
Currently working on a small turbine project to off set the energy cost for the bikeway/pedestrian path lighting system that was funded through a Montana Department of Transportation grant.

Type of turbine: 10 kw Bergy, will have to utilize a few different funding sources for the whole package as the overall cost will be between $45-50,000.00

Strategic Planning Report
November 9-10, 2004

Fort Belknap Agency,
Harlem, Mt
(Excerpt from the Strategic Plan).

**INFRASTRUCTURE – GOALS 3-5 YEARS**

- Water treatment facility
- Increase Community Collections Since Funding Agency Has Collections as their Top Priority before Assisting the Tribe.
- Water Meters for Homes
- Have Council Support
- Address other Stipulations the Funding Agency is requiring of the Tribe
- Provide Increased Opportunities for Businesses, Industry, Health Facilities, etc.

2. **Moving/Cleaning Transfer Sites**
   - Close Dumps at Night – Employee at Site When Open
   - Integrated Solid Waste Management Plan
   - Open Dump Clean-Up Grant through EPA
   - Recycling Center
   - ICDBG for Dump Clean-Up Or Other Grants
   - No IHS Funding
   - Public Education

3. **Wind Technology Development**
   - Research/Find Funding for Feasibility Study

4. **Scattered Site Water Quality**
   - No IHS Funding – Look at Other Funding Sources

8. **INFRASTRUCTURE**

*Wind speeds are based on a Weibull k value of 2.0
NREL Anemometer

Site #1
South of Hays, Mt

Monitoring period ran for 21 mo.

Avg. annual wind speed (at 20 meters [66']) measured at the site is 5.6 m/s (12.4 mph). This average annual wind speed would suggest a moderate wind source, capable of supporting a small grid connected project. One small project that was discussed is a grid connected turbine to offset energy costs at the Hays-Lodgepole High School.
NREL Anemometer

Site #2

In November/2002 the Anemometer Tower was relocated to the second site for data collection on the northern portion of the reservation. This is located on tribal land North West of the Fort Belknap Agency at, T31N,R22E,Sec.4, SE1/4,SW1/4,SW1/4.
DRAFT:

Energy Policy demonstrates environmental leadership and provides direct economic and environmental benefits to the Fort Belknap Community.
Fort Belknap Indian Community

Requested Technical support

- Equipment loan through the National Renewable Energy Laboratory ("NREL") Equipment Loan Program.
- DOE Grant Submission
Fort Belknap Indian Community

On-going projects

- Fort Belknap Indian Community (FBIC) is presently studying the feasibility of operating a community-sized ethanol production facility, feeding the wet distillers’ byproducts (WDB) to feeder cattle in a climate-controlled feedlot, and building an anaerobic digestion (AD) system to create biogas from the animal waste which powers the ethanol plant. It is anticipated that this three-fold production process will create dynamic economic synergies to produce a profitable renewable energy business venture as an employment and economic development project on Fort Belknap Reservation. The ultimate goal is to site, design, engineer, construct, and operate such an integrated bio-refinery (IBR) facility, on Fort Belknap Reservation, if feasible.

</table>
ECONOMIC DEVELOPMENT

- Keep our dollars on the reservation
- Identification and Develop Natural Resources: Oil and Gas, Timber, Water, Gravel, Coal, Gold, Silver, Ranching/Farming, Air
- Establish a Hotshot Crew
- Develop the Tribes' Natural Resources, i.e., establish a sawmill, windmill, Farms/Energy, improve forest resources
- Business Code
- Manage BLM's Land base, i.e. campgrounds, suppression
- Establish a branch bank
- Parks and Recreation Department
- Offer training programs at FBC to fill positions with qualified employees.

Youth Jobs and Entrepreneurship
Develop jobs at Lodgepole Store, Entrepreneurship, Ethanol Plant and Water Compact
Create a plan of action
Education and Training Money: Post Office, Financial Institutions, Small Businesses, Lumber yard, Job Creation
Support local businesses
Lack of Economic Opportunities
Upgrade Technology to expand resources
Tourism Opportunities
Water Compact

Fort Belknap Indian Community

Strategic Planning Seminar
On-going projects

Little Rockies Meat Packing Company

Little Rockies meat packing is proudly and successfully owned and operated by the Assiniboine and Gros Ventre tribes of Montana. **Pride of the Little Rockies Smoke House** The Pride of the Little Rockies is a Tribal enterprise, 100% owned by the Fort Belknap Indian Community and is a subsidiary of Fort Belknap's Little Rockies Meat Packing, Inc. Our products which are Beef and Bison Jerky, Meat Snack Sticks, and eventually Sausage Products, will be manufactured in a smokehouse facility on the Fort Belknap reservation in Montana where the existing commodity building is located. The established smokehouse will produce healthy smoked meat snacks made from beef and bison raised on the Fort Belknap Indian Reservation and the surrounding communities of North Central Montana. This smokehouse will provide employment opportunities for the Fort Belknap Indian Reservation and the surrounding communities.

We will be branding the **Pride of the Little Rockies** as a Native American enterprise within the Montana market, because of the many competitors and which only a few are Native American owned. We will also be promoting the bison products which will be our niche and what will set us apart, because our tribe, the Fort Belknap Indian Community, manages a bison herd of approximately 600 head on the reservation.
Project Status

- “Kick-off Meeting Held
- Order/scheduling Met-tower installation
- Radio Tower Communications
- Remote water site
Activities Yet to Be Completed

- Phase I Avian Screening
- Permit Process (to be completed)
- Transmission capability review
- Collection of wind data
- Marketing Analysis
Future Plans

- This Study will help determine whether the wind resources at specific sites on the Reservation are capable of being developed economically.
