

Karuk Tribe Strategic Energy Planning

Journey
To
Success?

The 5 P's of Success

#1 - Partners

Local Agencies

Tribal/Community
members

Tribal Council

Board members

Departments within Tribe

Local utility company

#2 - Politics!

Are they favorable?

Is there opposition?

Is it Council politics or community politics

How can you bring them on board with the project?

Can you find a "champion"

Community Development or Natural Resources?

Will your utility company work with you?

#3 - Plan

What is in a strategic energy plan?

Where do we start?

Do you have one already?

Who has the expertise to help?

Commercial or community scale projects?

What will we use the plan for?

What are all of those acronyms?

4 - Place

What locations does the plan need to include?

Reservation

Trust Land

Private land

Fee status land

How close to power station

What exists already in the specified locations

5 - Pfunding

Where do we start?

Who funds comprehensive strategic plans?

Can you get one done for free?

In Conclusion

- Nothing happens fast!
- As you move forward there will be more questions
- Having a plan is critical to success
- Never be afraid to ask for help
- Utilize your partners
- Good Luck!
