Comment: My comment is clearly to support construction of the proposed three LNG Export Terminals in the Brownsville Ship Channel area. While there is always a "trade-off" in every decision we make in life, I believe the hazards in this effort are most minimal and the long term economic benefit durable and far-reaching for this essentially poorest area in the nation. I believe the facts support this. The free market economy MUST

grow at least 2-3% per year in order to maintain job growth and velocity of money. Critics ignore this reality and offer nothing toward future jobs for the young and others. It is incumbent upon federal, state, local authorities and environmental groups to insure that such projects are viable, secure, and as hazard free as possible. I am a retired academic and lived, hunted, fished in the Rio Grande Valley all of my life. I care about the local habitat and this must receive strong focus from all parties to such ventures, of course. It is not enough simply to predict doomsday and merely say, no, no, no. OUR young also need our attention. Mark Magee, Brownsville TX *🌐
