**Subject:** Nuclear Waste

We should not leave messes for our children to clean up. If it can't be taken care of in one lifetime, we should not make the mess. Let's find ways to correct our mistakes, or at least make them easier for our kids to deal with.

The best solution is to go with renewable energy so that we don't have to worry about harming anyone or any of our precious creatures.

Thanks

Jane Patrick of Cedarville, OH
