M&O Contractor Standard Research Subcontract
(Educational Institution or Nonprofit Organization)

Guiding Principles
- Use of the model M&O research subcontract will benefit the DOE complex as well as the university research community.

1.0 Discussion

This chapter supplements other more primary acquisition regulations and policies contained in the references above and should be considered in the context of those references.

1.1 Purpose. The purpose of this chapter is to provide an updated version of the Management and Operating (M&O) Contractor Standard Research Subcontract (Educational Institution or Nonprofit Organization) Model and to encourage its use whenever appropriate.

1.2 Background. In 2004, the Integrated Contractor Purchasing Team (including representatives from other federally funded research facilities and DOE/NNSA) developed a model research subcontract. A subsequent review and update was completed in 2010 and disseminated via Policy Flash 2010-79. The attached update to the model subcontract (see Attachment 1) is the result of a similar stakeholders' collaboration from across the DOE complex. Accordingly, DOE encourages M&O contractors to use this model subcontract for unclassified research and development work not related to nuclear, chemical, biological, or radiological weapons of mass destruction or the production of special nuclear material. If the proposed subcontract is for other than standard research and development work (e.g. work performed on a DOE/NNSA site, a programmatic requirement for open source software distribution, etc.), the articles and clauses, in the model should be tailored to address those specific requirements.

While we understand that some M&O contractors have developed automated systems that may not be able to handle the identical sequence of the standard subcontract without major reprogramming (e.g. signature page is at the end rather than the beginning), it is not necessary to reprogram existing systems as long as the model text of the articles and clauses are used. Contractors may also make minor changes and/or additions to the text (e.g. change "mailed" to "e-mailed" or
"faxed," require payment by electronic funds transfer, or require reports to be submitted electronically, etc.).

We believe that usage of this standardized research subcontract will benefit the DOE complex as well as the university research community and request your support and encouragement of its use.

The Contractor does not expect that results of the research project will involve classified information or Unclassified Controlled Nuclear Information (UCNI) (See 10 CFR part 1017). However, the Contractor may review the research work generated under this Subcontract at any time to determine if it requires classification or control as UCNI.

B. If, subsequent to the date of this Subcontract, a review of the information reveals that classified information or UCNI is being generated under this Subcontract, then the security requirements of this Subcontract must be changed. If such changes cause an increase or decrease in costs or otherwise affect any other term or condition of this Subcontract, the Subcontract shall be subject to an equitable adjustment as if the changes were directed under the Changes clause of this Subcontract.

C. If the security requirements are changed, the Subcontractor shall exert every reasonable effort compatible with its established policies to continue the performance of work under the Subcontract in compliance with the change in the security requirements. If the Subcontractor determines that continuation of the work under this Subcontract is not practicable because of the change in security requirements, the Subcontractor shall notify the Contractor's Procurement Representative in writing. Until the Contractor's Procurement Representative provides direction, the Subcontractor shall protect the material as directed by the Contractor.

D. After receiving the written notification, the Contractor's Procurement Representative shall explore the circumstances surrounding the proposed change in security requirements and shall endeavor to work out a mutually satisfactory method to allow the Subcontractor to continue performance of work under this Subcontract.

E. Within 15 days of receiving the written notification of the Subcontractor's stated inability to proceed, the Contractor's Procurement Representative must determine whether (1) these security requirements do not apply to this contract or (2) a mutually satisfactory method for continuing performance of work under this Subcontract can be agreed upon. If this determination is not made, the Subcontractor may request the Contractor's Procurement Representative to terminate the Subcontract in whole or in part. The Contractor's Procurement Representative shall terminate the Subcontract in whole or in part, as may be appropriate, and the termination shall be deemed a termination under the terms of the Termination for the Convenience of the Government clause.
