Submitter Info

Comment:	DOE seeks information in the following area: 4. What are the benefits and drawbacks of a PI, compared to a federally-financed capital project resulting in a government-owned contractor-operated (GOCO) interim storage facility? Here is our response: As mentioned in our previous submission (our third), DOE's name is mud when it comes to radioactive waste management. This includes GOCO endeavors such as the high-level radioactive waste liquid vitrification plant at Hanford Nuclear Reservation, which is many years behind schedule and billions of dollars over budget; as well as the utter failure at the Mixed Oxide Fuel Fabrication
-----------------	---

Facility at Savannah River Site, South Carolina, one of the worst boondoggles in DOE -- and in fact U.S. federal government -- history. As the BRC recommended as its second highest priority in its Final Report in January 2012, DOE must be replaced with a competent, trustworthy radioactive waste management federal agency. *🌐
