Comment:	DOE has requested information regarding this question: 7. How could a PI manage liabilities that might arise during the storage period? Here is our response/comment: As mentioned in our previous responses to DOE questions (the third and fifth DOE questions, and our responses to them), all costs, liabilities, and risks should be borne by the PI companies involved, not by the public. If the PI companies are not willing to bear the burden of all liabilities involved in the centralized interim storage scheme, this is a clear sign that the proposal is too risky to undertake. To undertake it nonetheless, at taxpayer liability (such as called for by WCS
-----------------	--

in TX), would create a moral hazard with a highly radioactive twist! *🌐
