Agenda

- Agenda Review and Ground Rules
- Opening Polls
- Brief Residential Network Overview and Upcoming Call Schedule
- Featured Speakers
  - Laura Orfanedes, Director of Strategy and Marketing, Fiveworx
  - Kevin Duffy, Program Manager, ICF International
  - Kathy Kuntz, Executive Director, Cool Choices (Network Member)
- Discussion
  - What are key challenges and opportunities to deploy interactive engagement strategies?
  - What benefits do these strategies offer on top of usual marketing campaigns?
  - What are keys to developing and implementing successful interactive strategies?
  - What interactive engagement strategies have worked well for your program? Have these campaigns resulted in increased program demand?
- Closing Poll
Better Buildings Residential Network: Connects energy efficiency programs and partners to share best practices and learn from one another to increase the number of homes that are energy efficient.

Membership: Open to organizations committed to accelerating the pace of home energy upgrades.

Benefits:
- Peer Exchange Calls 4x/month
- Tools, templates, & resources
- Recognition in media, materials
- Speaking opportunities
- Updates on latest trends
- Voluntary member initiatives
- Residential Program Solution Center guided tours

Commitment: Provide DOE with annual number of residential upgrades, and information about associated benefits.

For more information or to join, email bbresidentialnetwork@ee.doe.gov, or go to energy.gov/eere/bbrn and click Join
Peer Exchange Call Series

*We hold one Peer Exchange call the first four Thursdays of each month from 1:00-2:30 pm ET*

Calls cover a range of topics, including financing & revenue, data & evaluation, business partners, multifamily housing, and marketing & outreach for all stages of program development and implementation

**Upcoming calls:**

- April 6: [Master Key: Unlocking Innovative Approaches to Program Design](#)
- April 13: [Ultimate Retrofit: Zero Energy Ready Homes](#)
- April 20: [Two Is More Than One: Leveraging Strategic Partners](#)
- April 27: [Just What the Doctor Ordered: Integrating Health Benefits into Energy-Efficiency Programs](#)

Send call topic ideas to peerexchange@rossstrategic.com

See the Better Buildings Residential Network Program [website](#) to register

Stacking Behavior
In Our Favor

Laura Orfanedes, Fiveworx

DOE Peer Exchange
“Who’s Got Game?”
Interactive Customer Engagement Strategies
The Challenge

- 80% of Americans think they use less energy than they did 5 years ago.
- 49% think their homes are already energy efficient.
- 50% claim to have made 1-3 efficiency improvements to their homes.
- 67% are unaware or unfamiliar with utility rebate programs.

Source: Energy Pulse 2013
Pilot Goals

- Increase Program Participation
- Improve Customer Satisfaction
- Assess ability to capture behavioral savings
A Stacked Behavioral Strategy

Commitment + Feedback + Follow-through + Framing + Rewards & Gifts = Behavior change!
Approach

1. Identify segments and propensities.

2. Develop customer journeys.

3. Track and analyze online user behavior.

5. Nudge customers over time to drive engagement and action.
AWARD-WINNING PROGRAM RESULTS

- **OPENS**: 33% Above Industry Average
- **CTA CLICK-THROUGHS**: 84% Above Industry Average
- **CLICK-TO-OPENS**: 145% Above Industry Average
- **PROGRAM AWARENESS**: 33% Increase
- **WEBSITE VISITS**: 141% Increase

**150% Increase**
PROGRAM PARTICIPATION

**5% Increase**
CUSTOMER SATISFACTION

**Verified Savings**
kWh AND THERMS
Presentation Highlights: Fiveworx

- **Persona segmentation** helps identify the key underlying drivers of the target audience and tailor custom messages:
  - **True believers:** early adopters of technology. Respond to non-energy benefits like home performance and comfort.
  - **Concerned parents:** family-oriented. Comfort and non-waste drive their decisions.

- **These segment-based models are a great way to:**
  - identify the energy upgrades customers are most likely to participate in.
  - tailor communications and customer journeys based on each target persona.

- **Machine learning & marketing automation** analyze in real time the customers’ behavior and help increase relevance and personalization of messages.

Round 2: Bracket 3

Energize New York*

For this week’s installment of Testimonial Tuesday we are featuring members of the family that know all about the warm and cold spots in their house. Energized pets Buddy and Mr. Bojangles said “Ruff Ruff Bark Bark” about their warmer spaces.

Our translator quotes Buddy saying “I spend more time in our house than any other family member and am most pleased that my favorite spot on the tile floor in the kitchen is no longer drafty and ice cold during snowy winter days. Now I don’t even need my slippers!”

Fuel Fund of Maryland*

Your house can work harder for you

We’re a hard working country. We don’t like laziness or wastefulness. We each work hard for ourselves, our families, our friends, and our communities. But too often our houses don’t work hard enough for us; they’re lazy and wasteful, even though solutions are available today. We deserve better, high performance houses that work as hard as we do. Ask a qualified professional today about how getting an energy upgrade and how your house can work harder for you.

Loyalty and Rewards Programs

A Primer
Loyalty and Rewards Programs

- Customers expect added value
- Mutual benefit with proactive customer relationship management
- U.S. enrolled in 21.9 per household
Loyalty Programs

- **Successful programs develop an emotional attachment through:**
  - Personal recognition
  - Preferential treatment
  - Exploration experience
Value of Loyalty Programs

- 76% of customers think that loyalty programs are part of their relationships with brands.
- 75% of U.S. companies with loyalty programs generate a return on investment.
- 83% of customers agree that loyalty programs make them more likely to continue doing business with certain companies.
- The probability of converting a new customer is 5-20% whereas the probability of converting an existing customer is 60-70%.
- 25% of consumers are frustrated when a company fails to recognize them as a past or current customer.
- 67% of U.S. adults would be willing to give companies access to basic personal information in exchange for better service or products.
- It is 6-7 times more expensive to acquire a new customer than it is to keep a current one.
- Existing customers spend 67% more than new customers.
Utility-Customer Relationship Evolution

Customer retention and loyalty are new dimensions of "satisfaction"

23% - Actions to Take Care of the Environment
Win, Win, Win!
What Does it Mean?

- **Same goal**
  - Increased sales
  - Customer retention
  - Customer satisfaction

- **SLIGHTLY different approach**
  - ENGAGE with sticky content
  - REWARD for action
  - Community
  - Cohesive program offering
Thank you
Pay attention to the customer’s buying journey and their retail experience:
- Customers are more than customers, they’re brand advocates.
- Designing positive customer experiences will result in higher retention.

Create sticky content to engage customers and ensure they come back.

Use games like loyalty and rewards programs to connect with large communities:
- The Consumers Energy Smart Energy Challenge (SEC) launched a rewards website where customers could learn about energy efficiency and earn points from games, such as energy-related trivia.
SEC offered multiple benefits to increase participation and create a win-win for both parties.
- **Customers** earned points they could donate to local NGOs or redeem for energy efficiency products to local retailers.
- **Utilities** benefited from increased program participation and energy efficiency awareness.
- **Local NGOs** received cash rewards from points donated by customers.
- **The local economy** benefited from a greater uptake of energy efficient products.

SEC coupled traditional communication strategies with community-based social-marketing.

Make participation fun and meet your target audience where they are:
- SEC’s event “Zoo Goes Boo” made participation fun and allowed on the spot registration.

Cool
Nudging Players to Efficiency Programs

• Pilot with Wisconsin’s Focus on Energy
  – Appliance Turn In
  – Energy Check Up
  – Home Retrofits

• Cool Choices did prompt new participation
  – “I didn’t know...”
  – “This was the nudge I needed to...”

• Some tracking challenges
Games Can Prompt Word of Mouth

Joyce
Nov 02, 2014 at 9:27am

We had our Focus on Energy home visit--it was fabulous! Nick installed lots of light bulbs, water savers in the kitchen and bathrooms faucets, new low use water shower heads, checked the temperature of the water heater and was a wealth of information, all for free. It was an hour well spent!
Games as a forum where players can brag...about their home energy reports!
Games Make Actions Visible
And Visible Actions Stick
Games Work

- Broaden Participation
- Prompt Information Sharing
- Create Buzz
- Deliver Persistent Savings

*Use games to accelerate efficiency efforts!*
- Games are a great way to make energy efficiency fun, social, and easy while gathering useful data information.
- Workplaces provide a forum to engage people in energy efficient behaviors due to peer-to-peer influence.
- Use clear, accessible language and avoid technical jargon to effectively communicate your message:
  - Use points to convey game results and avoid confusing metrics such as BTUs or kilowatt-hours.
- Make individual game progress visible to allow people see how they compare with others and ramp up their efforts.
- Aggregates are more compelling than individual data: the big picture builds momentum and drives participation.
  - For example, communicating that the team has saved 4 Olympic pools full of water is more compelling than an individual’s efforts.
Local competitions are more immediate and visceral and have a positive impact on participation rates.

Collecting data directly from game participants can help identify other engagement opportunities, including data on:

- **Behaviors**: can be used to promote greater residential savings, such as reducing water consumption by encouraging shorter showers.
- **Home appliances**: useful to direct people towards specific programs, such as the refrigerator program or energy audits, based on various upgrade needs.

Word of mouth and information sharing among participants creates positive reinforcement and a sense of shared values.

Participants that share pictures demonstrating their commitment to energy efficiency are more likely to continue that behavior due to a sense of commitment and visibility.
Explore resources related to interactive customer engagement strategies:

- Read about Salt Lake City’s stakeholder engagement process and the creation of a customer energy data access portal in this Better Buildings case study.
- Learn about the “peer diffusion” strategy as an opportunity to engage customers through social interaction and comparison of home energy upgrades in this RMI report.
- Explore strategies for engaging customers through the communication of your program’s impacts in the Program Design & Customer Experience – Communicate Impacts handbook.

- Check out the latest Proven Practices post on Recognizing Good Contractor Performance.
- The Solution Center is continually updated to support residential energy efficiency programs—member ideas are wanted!
