

# National Nuclear Security Administration Categorical Exclusion Determination Form

NEPA ID#: OST 17-001

Proposed Action Title: OST TRACOM LSS Improvements

Program or Field Office: DOE/NNSA Office of Secure Transportation (OST)

Location(s) (City/County/State): Fort Chaffee, Arkansas

Proposed Action Description:

The Office of Secure Transportation proposes to fund the US Army Corps of Engineers (USACE) to construct site improvements to the Logistics Support Site (LSS) located at 11408 Roberts Blvd in Fort Smith, Arkansas (72903). The scope of the project includes constructing a concrete backlot behind the vehicle maintenance facility (VMF) and make several improvements for storm water drainage around the perimeter of the site. This scope of work includes adding approximately 155,000 square feet of concrete paving for vehicle maneuvering in and around the vehicle maintenance shop in a previously graded and graveled area. Drainage improvements involve regrading and/or slope protection around the perimeter of the property; these would not change the overall drainage characteristics of the property or result in new sources of discharge.

Categorical Exclusion(s) Applied:

- B1.15 Support buildings
- B1.33 Stormwater runoff control

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions including the full text of each categorical exclusion, see Subpart D of 10 CFR 1021.

**Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)**

**The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.**

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species) unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

**There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.**

**The proposal has not been segmented to meet the definition of a categorical exclusion.** This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of information conveyed to me and in my possession concerning the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action and that other-regulatory requirements set forth above are met. Therefore, the application of a categorical exclusion is appropriate.
