

Acknowledgments

This report was prepared for the National Renewable Energy Laboratory (NREL) and funded by the U.S. Department of Energy’s Office of Energy Efficiency and Renewable Energy, and the Permitting, Siting and Analysis Division of the Office of Electricity Delivery and Energy Reliability under National Renewable Energy Contract No. DE-AC36-08GO28308. The project was managed by Charles Kurnik of NREL. The Cadmus Group, Inc., managed protocols development with participation from a broad cross-section of experts.

The project engaged a steering committee to provide industry insight and intelligence. We would like to thank all the individuals who participated in the steering committee, both past and present (see list below), for their contributions, and for engaging their organization’s staff in the reviews.
