Idaho National Engineering and Environmental Laboratory

**INTEGRATION OF SHOSHONE-BANNOCK TRIBES' PERSPECTIVES
REGARDING RISK ASSESSMENT**

The Idaho National Engineering and Environmental Laboratory Citizens Advisory Board (INEEL CAB) recommends that the U.S. Department of Energy's Idaho Operations Office expand the use of the Shoshone-Bannock Tribes' expertise to more fully integrate tribal perspectives into the risk assessment processes that support decision-making. Risks to cultural and traditional resources of significance to the Shoshone-Bannock Tribes should be more fully assessed in both the human health and the ecological risk assessment processes.
