Submitter Info

Comment:	Rural America's infrastructure has been left behind for too long, eliminate barriers that prevent virtually all infrastructure projects from being efficiently developed and managed. Incentivize the efficient development and management of water infrastructure, in part, by providing more flexibility to the U.S. Army Corps of Engineers and its partners. shorten and simplify the approval process for infrastructure projects. Eliminate certain redundant and inefficient provisions in environmental laws. make reforms so Americans secure good-paying jobs and meet the needs of our industries. Regulatory barriers that needlessly get in the way of infrastructure projects must be removed.
