Comment:	Removing Burdensome Regulations can drive an economic boom that raises incomes and expands job opportunities for all Americans. My view on this is simple: If you really want to pursue a policy that ships jobs overseas, enact a regulation or tax it, If we purposefully enact policies to make it more expensive, American businesses and jobs will go to China, India, and elsewhere. . 2011 a US senator criticized the Obama Administration's anti-energy agenda, "I have not seen a more anti-energy Administration than the current one. And all Americans are feeling the pain of President Obama's suicidal energy policies," . regulations are so incredibly harmful to
-----------------	---

our nation and our economy and to American families who have dedicated their lives to providing the United States . Environment and government taking the road of conservation, do not build, do not make, do not use. Is a lack of leadership of what made America great. Stop spending money on reports, meeting, conferences, committees. Need to address gaping trade deficit. maintain America's role as the most competitive economy on earth. If we don't develop a non-regulation type U.S. policy, we will be subject to the whims of foreign dictators . That would be disastrous for our economy. Thanks to the shale energy revolution, America is one of the world's top producers of natural gas. While our nation's families and industrial and manufacturing bases rely on this abundant fuel source, some areas of the country lack necessary pipeline infrastructure. This lack of infrastructure leads to unnecessarily inflated costs for electricity for both consumers and job creators," said Rep. Flores. "The Promoting Interagency Coordination for Review of Natural Gas Pipelines Act will allow us to fully harness this environmentally friendly, affordable and abundant resource by bringing greater transparency and accountability to the natural gas permitting process for interstate pipelines. These improvements encourage a more robust and reliable pipeline infrastructure system, which in turn will deliver clean, affordable natural gas to hardworking American families." "Our focus has been and will continue to be building America's energy infrastructure, creating jobs, and strengthening our economy. streamline the permitting process for building energy infrastructure which in turn strengthens our economy, creates jobs, and increases our energy security. Obama said in In 2011, natural gas provided 25 percent of the energy consumed in the United States. Its production creates jobs and provides economic benefits to the entire domestic production supply chain, as well as to chemical and other manufacturers, who benefit from lower feedstock and energy costs. By helping to power our transportation system, greater use of natural gas can also reduce our dependence on oil. And with appropriate safeguards, natural gas can provide a cleaner source of energy than other fossil fuels. For these reasons, it is vital that we take full advantage of our natural gas resources. Interior dept reported collecting over \$49 billion from fiscal years 2011 through 2015 from royalties and other payments. GAO said Federal oil and gas resources provide an important source of energy for the United States; create jobs in the oil and gas industry; and generate billions of dollars annually in revenues that are shared between federal, state, and tribal governments. The Federal government has been collecting revenues from mineral production on Federal onshore lands since 1920; on American Indian lands since 1925; and on Federal offshore lands since 1953. In 1982, the Federal Oil and Gas Royalty Management Act , collection, accounting, and disbursement of these revenues. Since that time, Interior has provided over \$280 billion to Federal, State, and American Indian recipients through this program. Approximately 60 percent of all annual collections have gone to the General Fund of the U.S. Treasury, 22 percent to special purpose funds, 14 percent to States, and almost 4 percent to the American Indian community. Special purpose funds, including the LWCF, the HPF, and the Reclamation Fund, have received \$61.8 billion in ONRR-collected mineral revenues since 1982. Each month, ONRR receives and processes about

49,000 royalty and production reports, containing approximately 845,000 lines of data, from approximately 3,300 royalty payors and 1,500 production reporters. *🌐
