FEDERAL UTILITY PARTNERSHIP WORKING GROUP SEMINAR

November 7-8, 2018
Herndon, VA

Performance Contracting
Measuring Success

Hosted by:

[Logo images for FEMP and Dominion Energy]
Overview

• Government-wide Findings
• Measuring for Success
• Options:
  – Government-wide Target
  – Agency self-identified targets ($/# actions/%)
  – Percentage of utility costs
  – Percentage of ECMs or PC/Total potential investment
  – PC>Direct Appropriations
  – Others?
FY 2017 Government-wide Results

• Facility energy intensity (Btu/Gross Square Foot) reductions
  – 26.7% reduction vs. 2003 – goal is 30%
  – 7.6% reduction vs. 2015

• Renewable electricity goal of 7.5% was exceeded (10.7% of electricity use)

• Potable water intensity reduction: 26.1% reduction vs. 2007, 3.8% vs. 2016

• Industrial/Landscaping/Agricultural (non-potable) water use was reduced 33.7% vs. 2010

• Efficiency investment in Federal facilities ($1.5B total in FY 2017) decreased 14% from 2016
  – Direct funding investment: $355 million in FY 2017
  – ESPC investment: $1,009 million
  – UESC Investment: $158 million

• Anticipated savings from efficiency investments since 2007: $49 Billion by 2030

• Covered fleet petroleum use declined 1.0% from the prior year, but increased 1% from 2005

• Alternative fuel use in fleets increased 111.2% vs. 2005, but declined 10.3% from 2016 (alternative fuels are 3.8% of total fuel used)

• 4.5% of eligible buildings and 10.4% of eligible square feet are high-performance sustainable buildings

• Federal Government included sustainable acquisition requirements in more than 126,000 contract actions valued at more than $332M

• Scope 1&2 greenhouse gas emissions declined by 25.7% vs. 2008, about the same as 2016

**Biobased Product Purchase Targets (# of actions): FY18: 671; FY19: 684**

**Reduction in Agency Scope 1 and 2 GHG emissions from 2008:** 23.3%

Sources: Agency submitted data from Annual Energy Data Report, EISA 432 Compliance Tracking System, Federal Real Property Profile, Federal Automotive Statistical Tool, FPDS

Btu = British thermal units  
GSF = Gross square foot  
MBtu = Million Btu  
ESPC = Energy Savings Performance Contracts  
UESC = Utility Energy Savings Contracts  
ECM = efficiency/conservation measure  
AFV = alternative fuel vehicle  
FPDS = Federal Procurement Data System  
GHG = greenhouse gas
**Facility Energy Efficiency**: Agencies are assessed on progress made to meet and exceed the statutory goal of a 30% reduction in Btu/GSF by 2015 from a 2003 baseline. OMB will also track agency’s average cost of all facility energy.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agency achieved &gt;30% reduction since 2003 AND achieved an incremental reduction from 2015.</td>
<td>Agency achieved &gt;30% reduction since 2003 OR made an incremental reduction in energy intensity from 2015.</td>
</tr>
</tbody>
</table>

**Identification of Efficiency Measures/Investment**: Agencies are assessed on EISA 432 facility evaluations, identifying ECMs, and whether performance contracting was utilized in FY 2017. OMB will also track investment levels and annual Btu saved per $1 of investment.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>&gt;90% of facility evaluations completed/updated within last 4 years AND agency awarded performance contracts in FY 2017.</td>
<td>&gt;75% facility evaluations completed/updated within last 4 years OR agency awarded performance contracts in FY 2017.</td>
</tr>
</tbody>
</table>

**Renewable Energy**: Agencies are assessed on meeting or exceeding 7.5% renewable electricity use annually. OMB will also track non-electric RE use.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Renewable electricity comprised ≥7.5% of total electricity use.</td>
<td>Renewable electricity combined with non-electric renewable energy sources (thermal + mechanical) comprised ≥7.5% of total electricity use.</td>
</tr>
</tbody>
</table>

**Water Efficiency**: Agencies are assessed on continued reductions in potable water use intensity and a 20% reduction from its 2007 baseline. OMB will track agency average cost of water and non-potable water use reduction as well.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agency achieved a 20% reduction in potable water use intensity from 2007 AND reduced its potable water use from prior year.</td>
<td>Agency achieved ≥20% reduction since 2007 OR achieved a reduction in potable water intensity from prior year.</td>
</tr>
</tbody>
</table>

**High-Performance Sustainable Buildings**: Agencies are assessed on the number and percentage of owned federal buildings that meet high performance building guiding principles (GP) and are tracked in the Federal Real Property Profile (FRPP).

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least 15% of agency owned buildings or GSF meet GP/equivalent standard &amp; this represents an increase from prior year level.</td>
<td>At least 15% of agency owned buildings or GSF meet GP/equivalent standard OR agency increased percentage of buildings or GSF from prior year.</td>
</tr>
</tbody>
</table>

**Fleet Management**: Agencies are assessed on meeting or exceeding a 20% reduction in petroleum use since 2005. OMB will also track other fleet measures to help agencies manage fleets and meet statutory requirements.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agency achieved &gt;20% reduction in petroleum since 2005 AND achieved a reduction in petroleum use from prior year.</td>
<td>Agency achieved at least a 20% reduction in petroleum since 2005 OR made progress in reducing its use from prior year.</td>
</tr>
</tbody>
</table>

**Acquisition**: Agencies will be assessed on the change from prior year performance of the percentage of contract actions and dollar value of sustainable acquisitions as reported in the FPDS, to include the mandatory clauses for the purchase of biobased, energy-efficient, recycled content and/or other sustainable attributes. OMB will also track as an indicator, agencies’ planned acquisitions of biobased products by number of contracts and estimated dollar value of those contracts.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agency increased percentage of sustainable acquisitions of total actions (both number of actions &amp; dollar value) from prior year percentage levels.</td>
<td>Agency increased percentage of sustainable acquisitions of total actions (either number of actions or dollar value) from prior year percentage levels.</td>
</tr>
</tbody>
</table>

**Greenhouse Gas Emissions**: Agencies’ GHG emission reductions compared to FY 2008 base year will be determined from its annual data report and tracked and reported as an indicator on the Scorecard.

*To be consistent with 42 USC 8253 (d)(1)(C), this metric will be revised for FY2018 to ensure efficient utilization of performance contracting to achieve goals.*
|---------|---------------------------|--------------------------------|----------------------|-----------------|-------------------------------------|---------------------------------|-----------------------|

N/A: Goal does not apply to the agency as it does not own, control, or report on its buildings.
Year: 2017
Federal Facility Energy Intensity: 93,489
Percentage Change from:
FY 1975: -50.1%
FY 2003: -26.7%
FY 2015: -7.6%

NECPA/EISA
89,314 Btu per GSF
30% reduction from FY 2003
Investment since 2007 is estimated to have avoided 103 trillion Btu of energy use in 2017

- Equivalent to annual energy used in more than 1,336,000 typical households
- Avoided cost of energy in 2017: $2.6 billion (at cost of electricity)

- Savings return of $49.0 billion by 2030, payback before 2020
- $21.8 billion investment equivalent to 174,000 job-years
- Approximately $10 - $15 billion of cost-effective investment potential available

Year: 2007-2017
Cumulative Investment: $21.8B
Cumulative Cost Savings: $15.4B

Year: 2020
Cumulative Cost Savings: $23.2B

Year: 2030
Cumulative Cost Savings: $49.0B
Measuring for Success
Option 1: Gov’t-wide Target

- Dictate Government-wide/agency-specific targets
- Challenge to meet within specified timeframe
- Presidential Challenge

**PROS:**
-- Provides direction
-- Pushes performance
-- Transparent goals

**CONS:**
-- No flexibility for aligning need to performance
-- Requires top level management and across-the-board buy in
-- May be hard to achieve on continual basis (>\$4 billion in 5 years)
Measuring for Success
Option 2: Agency-Specified Target

• Require agencies to establish plans for use of performance contracting
• Allow agencies to set annual targets
• Hold agencies accountable for achieving annual targets

PROS:
-- Flexibility
-- Transparency
-- Independence

CONS:
-- May not result in performance (Goals of zero)
-- Does not allow for tempo changes (annual vs. multi-year)
-- Difficult to keep steady tempo for supporting services
Measuring for Success
Option 3: Percent of Utility Costs

• Set individual agency targets by utility spend
• Hold agencies accountable to meet pre-established targets

PROS:
-- Targets based on agency provided data
-- Pushes performance for greatest impact
-- Transparent and adjustable as utility costs decline

CONS:
-- May not be best measure for investment need
-- May not have agency buy-in, impacting results
-- May be outside agency’s control
Measuring for Success

Option 4: Tie Targets to Identified ECMs

• Set targets based on $ value of ECMs identified
• Rank agencies according to investment targets
  (several potential approaches can be considered)

PROS:
-- Helps agencies manage process: identify—plan--implement
-- Incentivizes agencies to keep CTS up-to-date for evaluations
-- Incentivizes agencies to report on implemented projects
-- Data is available

CONS:
-- Normalization may overrepresent potential
-- Could limit agencies’ ability to “Get to Green”
-- May not recognize projects underway but not completed
Reported Findings in EISA 432 Compliance Tracking System

- 8,318 Covered Facilities, 2.7 billion square feet
  - 89% of total facility energy use
- 63% of Covered Facility Sqft evaluated within the last four years (in terms of energy use)
  - $8.6 Billion in potential ECMs identified with annual savings of $790 million (~81,000 ECMs)
  - Simple payback period: 10.8 years
  - Potential annual savings of 34 trillion Btu (10% of total) and 10 billion gallons of water (8%)
- $4.6 billion in implemented projects (2,826) reported
  - 14.7 trillion Btu in annual savings (4% of total) and 7 billion gallons of water (5%)
  - ~14,000 ECMs
- 28% of metered buildings benchmarked at least once
  - 13,694 of 48,768 individually-metered buildings
  - 6,573 (13.5%) buildings benchmarked in FY 2017

(Data as of 08/10/2018)
Potential Approaches

- **Total value of PC**
  Total potential (normalized)

- **Total annual investment (direct + PC)**
  Total potential (normalized)

- Score by tiering (25/50/25)

- Score by statutory requirement
  25% per year, implemented in 2 years, leads to 12.5% per year for green
Measuring for Success
Option 5: Performance Contracts > Direct Total

• Agencies demonstrate PC is greater than amount invested through direct appropriations annually
• Red or green—no yellow unless equal

PROS:
-- Demonstrates maximum use of PC
-- Encourages leveraging of appropriations w/PC
-- Easy to measure
-- Doesn’t penalize agencies that have no investments

CONS:
-- May not be fair if sufficient appropriated funding is provided
-- Doesn’t take into account types of identified ECMs
Federal Government Investment in Facility Efficiency Improvements

Investment (2017$)

- **2010**: $4,616.7M
  - Energy Savings Performance Contracts: $573.4M
  - Utility Energy Service Contracts: $72.1M
  - Direct Obligations: $3,409.1M

- **2011**: $4,500M
  - Energy Savings Performance Contracts: $405.1M
  - Utility Energy Service Contracts: $181.6M
  - Direct Obligations: $2,822.5M

- **2012**: $2,822.5M
  - Energy Savings Performance Contracts: $1,676.6M
  - Utility Energy Service Contracts: $106.4M
  - Direct Obligations: $1,165.4M

- **2013**: $1,642.8M
  - Energy Savings Performance Contracts: $1,442.8M
  - Utility Energy Service Contracts: $511.8M
  - Direct Obligations: $842.1M

- **2014**: $1,784.7M
  - Energy Savings Performance Contracts: $1,784.7M
  - Utility Energy Service Contracts: $109.7M
  - Direct Obligations: $938.6M

- **2015**: $2,040.9M
  - Energy Savings Performance Contracts: $479.9M
  - Utility Energy Service Contracts: $130.0M
  - Direct Obligations: $1,431.1M

- **2016**: $1,768.7M
  - Energy Savings Performance Contracts: $932.4M
  - Utility Energy Service Contracts: $211.1M
  - Direct Obligations: $625.2M

- **2017**: $1,521.7M
  - Energy Savings Performance Contracts: $1,008.6M
  - Utility Energy Service Contracts: $354.7M
  - Direct Obligations: $158.3M

**Funding Type**
- Energy Savings Performance Contracts
- Utility Energy Service Contracts
- Direct Obligations
