## PRODUCTS MADE FROM OIL AND NATURAL GAS

When you think about oil, there is probably one thing that immediately comes to mind: motor oil for your car or lawn mower. And, when you hear about natural gas, you may think about heating your home, cooking, or even electric power generation. But, there are many other uses for these hydrocarbons than what meets the eye.

Petrochemicals derived from oil and natural gas make the manufacturing of over 6,000 everyday products and high-tech devices possible. Major petrochemicals—including ethylene, propylene, acetylene, benzene, and toluene, as well as natural gas constituents like methane, propane, and ethane—are the feedstock chemicals for the production of many of the items we use and depend on every day.

Modern life relies on the availability of these products that are made in the United States and across the globe. We zero in on some of these common household and commercial products below. The list may surprise you!

Adhesive Air mattresses Ammonia Antifreeze Antihistamines **Antiseptics** Artificial limbs Artificial turf **Asphalt** Aspirin **Awnings** Backpacks **Balloons** Ballpoint pens Bandages Beach umbrellas Boats Cameras Candies and gum Candles Car battery cases Car enamel Cassettes Caulking CDs/computer disks Cell phones Clothes Clothesline Clothing Coffee makers Cold cream Combs Computer keyboards
