Mr. Christopher Lawrence
U.S. Department of Energy
Office of Electricity Delivery and Energy Reliability
OE-20, Room 8G-024
1000 Independence Avenue, S.W.
Washington, DC 20585

Re: Application of Saracen Power LP for Renewal of Authorization to Export Electricity from the United States to Canada
Docket No. EA-409

Dear Mr. Lawrence:

Please find enclosed (i) an original and two copies of the “Application of Saracen Power LP for Renewal of Authorization to Export Electricity from the United States to Canada,” and (ii) as required by 10 C.F.R. § 205.309 (2019), a check in the amount of $500 for the filing fee payable to the Treasurer of the United States. A copy of the Application is being served contemporaneously upon the Federal Energy Regulatory Commission as required by 10 C.F.R § 205.309 (2019).

Saracen Power LP (Saracen Power) respectfully requests that the Department issue an order granting the requested reauthorization by no later than June 18, 2020, the date that Saracen Power’s current authorization is set to expire.¹

Finally, enclosed is an additional copy of this filing labeled “stamp and return.” Please date stamp the additional copy and return it in the additional FedEx envelope that has been included for your convenience.

¹ This timing is consistent with the ordering clause in paragraph (K) of the 2015 order granting Saracen Power authorization to export electricity to Canada, which requires Saracen Power to provide the Department at least 60 days to process a renewal application.
Thank you for your attention to this matter. Please contact us if there are any questions.

Sincerely,

Daniel E. Frank
Allison E. Speaker

cc: Federal Energy Regulatory Commission
APPLICATION OF SARACEN POWER LP FOR RENEWAL OF AUTHORIZATION TO EXPORT ELECTRICITY FROM THE UNITED STATES TO CANADA

Pursuant to Section 202(e) of the Federal Power Act ("FPA") (16 U.S.C. § 824a(e)) and the regulations promulgated under 10 C.F.R. §§ 205.300, et seq. (2019), Saracen Power LP ("Saracen Power" or "Applicant") hereby submits requests this Application for Renewal of Authorization to Transmit Electricity from the United States to Canada for a period of five years (or such longer period as may be permitted by the Department). In support of this Application, Saracen Power respectfully states as follows:

I. INTRODUCTION

On April 13, 2009, in Order No. EA-350, the United States Department of Energy, Office of Electricity Delivery and Energy Reliability ("Department") authorized Saracen Power LLC to export electric energy from the United States to Canada as a power marketer for a period of five years ending on April 13, 2014.\(^2\) On December 16, 2009, in Order No. EA-350-A, the Department amended Order No. EA-350 to reflect the change in the name of the authorized exporter to Saracen Power LP (the Applicant here).\(^3\) On June 18, 2015, the Department authorized Saracen Power to

---

export electricity from the United State to Canada for a period of five years ending on June 18, 2020. Saracen Power hereby requests that the Department renew its authorization to export electricity from the United States to Canada for a five-year period, or such longer period as the Department may authorize for similarly situated power marketers.

II. DESCRIPTION OF APPLICANT

The exact legal name of the Applicant is “Saracen Power LP.” Applicant is a Texas limited partnership with its principal place of business in Houston, Texas. Saracen Power LP is controlled by Saracen Energy Trading LP (“SET”), a Texas limited partnership and the sole general partner of Saracen Power LP. The general partner of SET is SET GP LLC, a Texas limited liability company that in turn is owned by individuals Neil Kelley and Mark Wilken. In addition to SET’s general partnership interest in Saracen Power LP, Saracen Power LP has one limited partnership interest, held by Saracen Energy FTR LP, which is managed by SET.

Saracen Power is engaged in, among other things, the marketing of electric power at wholesale, as well as in the physical and financial trading of other energy products. Saracen Power is authorized by FERC to engage in the wholesale sale of electricity at market-based rates. Neither Saracen Power nor any of its affiliates owns or controls any electric generation or transmission

---

5 Mr. Wilken, who acquired a minority, non-controlling interest in the general partner of Saracen Power since Saracen Power last requested export reauthorization in 2015, performs certain trading and management functions on behalf of SET.

facilities, nor does any of them hold a franchise or service territory for the transmission, distribution or sale of electric power.

Applicant will purchase the power to be exported to Canada from wholesale generators, electric utilities, and federal power marketing agencies. Applicant will have title to any electricity transmitted to Canada under the authorization sought in this Application. This application relates to Saracen Power as a marketer of electric power only.

Saracen Power is not seeking authorization to export power on behalf of, or in conjunction with, any partners or partnerships.

III. COMMUNICATIONS

Communications regarding this Application should be addressed to the following:

IV. JURISDICTION

Pursuant to FPA Section 202(e), the Department has jurisdiction over the action proposed in this Application. No other known federal, state or local government has jurisdiction over the actions to be taken under the authority sought in this Application, except to the extent that Saracen

Power must comply with applicable FERC requirements in making sales at wholesale. FERC’s address is:

Federal Energy Regulatory Commission  
888 First Street, N.E.  
Washington, DC 20426

V. RENEWAL AUTHORIZATION AND TECHNICAL DISCUSSION

Saracen Power hereby applies to renew its authorization to transmit electric power to Canada as a power marketer over any authorized international transmission facility that is appropriate for open access transmission by third parties in accordance with the export limits authorized by the Department. Saracen Power plans to export electric power over authorized transmission interconnections between Canada and the United States. Such sales would be made in foreign commerce at the U.S. – Canada border. Transmission to the point of delivery will be arranged by Saracen Power over any of the existing international electric transmission facilities set out in Attachment 1, and over any international transmission facilities that may be approved by the Department in the future.

Applicant does not currently own or control electric generation or transmission facilities, and does not have a power supply of its own in the United States on which its exports of power could have a reliability, fuel use or system stability impact. Saracen Power will purchase the electric power that it will export, on either a firm or an interruptible basis, from wholesale generators, electric utilities, and federal power marketing agencies voluntarily, and therefore will be surplus to the needs of the selling entities. Accordingly, the proposed exports will not impair or tend to impede the sufficiency of electric power supplies in the United States or the regional coordination of electric utility planning or operations. Additionally, as a power marketer that does not own or operate a transmission system, Saracen Power does not have the ability to cause a
violation of the terms and conditions in the existing authorizations associated with the international
transmission facilities identified in Attachment 1. Specifically, Saracen Power does not have the
ability to cause total exports on Presidential Permit facilities to exceed the authorized instantaneous
transmission rate.

Saracen Power will make all necessary commercial arrangements and will obtain any and
all other regulatory approvals required in order to carry out any power exports. This would include:
(1) scheduling each transaction with the appropriate balancing authority area in compliance with
all reliability criteria, standards, and guidelines of the North American Electric Reliability
Corporation and the relevant Regional Entities (collectively, “NERC”) in effect at the time of
export, and (2) obtaining all necessary transmission access over approved export facilities. Saracen
Power agrees to abide by the export limits contained in the relevant export authorization of any
transmission facilities over which Saracen Power exports electric power to Canada. The controls
that are inherent in any transaction that complies with all NERC requirements and the export limits
imposed by the Department on the international transmission facilities are sufficient to ensure that
exports by Saracen Power would not impede or tend to impede the coordinated use of transmission
facilities within the meaning of FPA Section 202(e).

In previous orders granting export authorizations to electric power marketers, the
Department declined to rigidly apply the information filing requirements contained in its
regulations and instead used a flexible approach which takes into consideration the unique nature
of power marketers and previously authorized export limits of cross-border facilities.8 These same

8 See, e.g., NorAm Energy Services, Inc., No. EA-105-CN (Aug. 16, 1996); MidCon Power
Services Corp., No. EA-114 (July 15, 1996); USGen Power Services, No. EA-112 (June 27, 1996);
considerations demonstrate that Saracen Power’s proposed exports will not impair or tend to impede the sufficiency of electric supplies in the United States or the regional coordination of electric utility planning or operations.

VI. CONSISTENCY WITH LAWS

Authorization of the exports proposed by Applicant is consistent with United States energy policy and will foster development of a more efficient and competitive North American energy market. Saracen Power will conduct all operations pursuant to this authorization in accordance with the provisions of the FPA and pertinent rules, regulations and orders adopted or issued thereunder, and in conformity with the applicable reliability criteria, standards and guidelines of NERC, reliability coordinators, and balancing authority area operator(s), including any applicable regional transmission organizations or independent system operators.

Because the proposed exports will occur over existing transmission facilities, Applicant respectfully submits that the Application qualifies for a categorical exclusion under the National Environmental Policy Act of 1969, such that neither an Environmental Agreement nor an Environmental Impact Statement is required.9

---

9 The Department previously determined that Saracen Power qualified for a NEPA categorical exclusion. See Saracen Power LP, “Order Authorizing Electricity Exports to Canada,” Order No. EA-409, at 8 (June 18, 2015).
Finally, Saracen Power will continue to comply with such requirements as may be imposed by the Department on other power marketers with blanket electricity export authorization, including making periodic reports to the Department regarding exports, as may be applicable or required.

VII. EXHIBITS

Saracen Power includes the following Exhibits with this Application:

- **Exhibit A (10 C.F.R. § 205.303(a)) – Export Agreements.** Not Applicable. Currently there is no agreement with any Canadian utilities to export electricity.

- **Exhibit B (10 C.F.R. § 205.303(b)) – Opinion of Counsel.** Attached as Exhibit B is the legal opinion of counsel that the proposed exports are within Saracen Power’s corporate power and that Saracen Power will comply with all pertinent Federal and State laws.

- **Exhibit C (10 C.F.R. § 205.303(c)) – Maps.** Not Applicable. Saracen Power has no “system” of its own to export electricity. Therefore, no maps are available to include as this Exhibit C. Additionally, as described above, Saracen Power requests authority to export energy to Canada over any international transmission facility authorized by Presidential Permit that is appropriate for open access transmission by third parties in accordance with the assessment made by the Department of the transmission limits for operation in the export mode.

- **Exhibit D (10 C.F.R. § 205.303(d)) – Agent for Foreign Entities.** Not Applicable. Saracen Power has offices in the United States and therefore no designated agent residing within the United States is required.
• **Exhibit E (10 C.F.R. § 205.303(e)) – Statement of Corporate Relationship.** Not Applicable. Saracen Power does not have any corporate relationship or existing contract between it and any other person, corporation, or foreign government, which in any way relates to the control or fixing of rates for the purchase, sale or transmission of electric energy.

• **Exhibit F (10 C.F.R. § 205.303(f)) – Operating Procedures.** Not Applicable. Neighboring utilities may be informed of any excess capacity and energy by participating in the competitive wholesale markets in the relevant areas.

• **Attachment 1 – Export Facilities.** A list of international transmission lines at the United States-Canadian border authorized for third-party use is attached to this Application as Attachment 1.

• **Attachment 2 – Verification.** Saracen Power has attached as Attachment 2 a signed, notarized verification of the factual representations in this Application.

To the extent necessary, Saracen Power requests a waiver of the requirement to provide the exhibits that are not applicable to this Application, as noted.
VIII. CONCLUSION

In order to maintain all regulatory authorizations for participation in emerging market opportunities, Saracen Power LP respectfully requests that the Department grant this Application and issue the requested reauthorization by no later than June 18, 2020, the date that Saracen Power’s current authorization is set to expire.

Respectfully submitted,

Attorneys for Saracen Power LP

Date: March 31, 2020
EXHIBITS A, C, D, E, F,

(NOT APPLICABLE)
EXHIBIT B

OPINION OF COUNSEL
LEGAL OPINION

United States Department of Energy
Office of Electricity Delivery and Energy Reliability
Washington, DC

Re: Application of Saracen Power LP for Renewal of Authorization to Transmit Electric Energy from the United States to Canada
(Docket No. EA-409)

Ladies and Gentlemen:

The following opinion is given in support of the Application of Saracen Power LP for Renewal of Authorization to Transmit Electric Energy to Canada.

1. I am an attorney at law, authorized to practice law in Texas;

2. I am employed as General Counsel to Saracen Power LP;

3. Saracen Power LP is duly established, validly existing and in good standing under the laws of the State of Texas and is authorized to do business in the State of Texas;

4. Saracen Power LP has full corporate power and authority to buy, sell or act as a marketer/broker in the sale and exportation of electric energy as described in the Application; and

5. Based upon my knowledge of the facts and the law, including as a result of my consultation with outside counsel, following the issuance of the authorization sought in the Application, Saracen Power LP will have complied with all federal and state laws applicable to the export of electric energy as requested in the Application.

This opinion is limited to the Federal laws of the United States, the laws of the State of Texas as of the date hereof, and I am expressing no opinion as to the effect of the laws of any other jurisdiction.

In rendering this opinion, I have (a) examined such corporate records, certificates and other documents, and such questions of law, as I have considered necessary or appropriate, (b) relied as to certain matters on information obtained from public officials, officers of Saracen Power LP and other sources believed by me to be responsible, and (c) assumed that the signatures on all documents examined by me are genuine, assumptions which I have not independently verified.
I am furnishing this opinion solely for your benefit in connection with the Application. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without my express written consent.

Very truly yours,

[Signature]

Allison P. Duensing
