RECIPIENT: Bishop Paiute Tribe

PROJECT TITLE: Bishop Paiute Tribe Residential Solar Program - Phase IV

Funding Opportunity Announcement Number: DE-FOA-0002168
Procurement Instrument Number: DE-IE0000133
NEPA Control Number: GFO-0000133-001
CID Number:

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination
Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

B5.16 Solar photovoltaic systems
The installation, modification, operation, and removal of commercially available solar photovoltaic systems located on a building or other structure (such as rooftop, parking lot or facility, and mounted to signage, lighting, gates, or fences), or if located on land, generally comprising less than 10 acres within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide funding to the Bishop Paiute Tribe (Bishop Paiute) to design, install and inspect grid-tied, rooftop-mounted solar photovoltaic (PV) systems on the rooftops of 19 owner-occupied, single-family homes of low-income families living on the Bishop Paiute Reservation in Bishop, CA. Upon installation, the solar PV systems would have a total capacity of at least 67 kW. The project would occur over a two and a half year period.

Proposed project activities would include on-site assessments, system design, homeowner orientations, solar system installation, and post-installation inspection/verification. Solar system installation would be performed by GRID Alternatives and qualified sub-contractors participating in GRID Alternative’s Sub-Contractor Partnership Program (SPP). Over the past five years Bishop Paiute has worked with this same non-profit solar installer to install approximately 315 kW of solar PV systems on 98 other residences within the Reservation.

All solar PV systems would be installed on the rooftops of existing houses. No ground disturbing activities or tree/vegetation removal would be needed to implement the project. Any permits needed for the project work would be obtained prior to installation. Proposed work would occur on Tribal Trust land and no Bureau of Indian Affairs involvement is necessary, as Bishop Paiute is not requesting a surface lease, access road right of way or power line right of way. There are no historic properties or districts listed on the National Register in or near the proposed project area. The oldest homes involved in the project were built in the late 1960’s but most of the homes were built since the 1990’s. Due to the project area’s location and nature of the installations, DOE does not anticipate any impacts to resources of concern due to the proposed activities of the project.

NEPA PROVISION

DOE has made a final NEPA determination.

Notes:

Office of Indian Energy Policy and Programs
This NEPA Determination does not require a tailored NEPA provision.
FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
