

Operations Division – Hydropower Optimization Initiative

Great Lakes &
Ohio River Division

Events:

- Centralized Control Center (CCC) Analysis of Alternatives

Communication Objectives:

- Optimize return on investment into hydropower operations, increasing reliability, and responsibly stewarding jobs and resources
- Maintain transparency between USACE leadership, employees, and key stake holders in the region

Activities:

- Barkley conversion from master plant to remote capable plant: estimated completion date FY 21
- FY 23 PRIP request for CCC
- Ongoing communication with USACE, SAD and SWD
- Expected project time horizon of ~10-years

Key Take-Away:

- Nashville District will pursue innovative ways to increase efficiency and reliability of the renewable energy resource that hydropower provides to SEPA
