

# Offshore Wind Turbine Radar Interference Mitigation

## Webinar Series: Long-Range Radar

Monday, November 30, 2020 – 11:00a.m. to 1:00p.m. Eastern	
11:00 a.m.	<p><b>Welcome, Meeting Objectives</b> Patrick Gilman   U.S. Department of Energy Wind Energy Technologies Office (WETO)</p>
11:05 a.m.	<p><b>Long-Range Radar Overview &amp; Application to Offshore Wind</b></p> <ul style="list-style-type: none"> <li>• Missions of Air Route Surveillance Radar Sources</li> <li>• Currently Deployed Long-Range systems</li> <li>• Wind Farm Impacts on Long-Range Systems</li> <li>• Coastal Long-Range Radar Challenges</li> <li>• Existing Long-Range Radar Clutter Mitigations</li> <li>• Limitations of Existing Mitigation Strategies</li> </ul> <p>Mark Carmouche   Federal Aviation Administration (FAA)</p>
12:05 p.m.	<p><b>Group Discussion: Questions/Answers/Mitigation Opportunities</b> This session provides an opportunity for industry participants to ask questions and provide feedback on past wind-radar related studies as well as provide ideas on future mitigation techniques and the potential of partnering on offshore mitigation opportunities.</p> <p><b>Moderators:</b> Patrick Gilman   U.S. DOE WETO Steve Sample   U.S. Department of Defense Military Aviation and Installation Assurance Siting Clearinghouse</p> <p><b>Participants:</b> ALL</p>
12:55 p.m.	<p><b>Closing Information</b> Patrick Gilman   U.S. DOE WETO</p>
1:00 p.m.	<p><b>Webinar Ends</b></p>
