

**We advance solutions
to end global homelessness.**

An aerial photograph of a settlement nestled in a dense, lush green forest. The scene is captured during the golden hour of sunset, with warm, golden light filtering through the trees and creating a hazy atmosphere. In the foreground, a cluster of approximately 15-20 buildings with bright white, gabled roofs stands out against the surrounding greenery. These buildings are arranged in a somewhat organized fashion, with narrow paths or roads between them. To the left and right of this main cluster, there are more scattered, smaller structures, some with blue roofs, partially obscured by the thick forest. The overall composition is dominated by the textures and colors of the forest and the stark contrast of the white roofs.

VENTURES

Tangible Application

3D HOME PRINTING

"When we build homes faster and less expensively but also with high quality, it's a win for all parties involved but especially beneficiary families. What we are especially intrigued by is 3D printing's ability to customize homes for increased dignity."

Gretel, Echale a Tu Casa, Mexico

Airworks

- AI-powered software that converts aerial data into CAD models using computer vision and machine learning.
- Resulting in **80% time and cost savings** for all construction package deliverables.

PROVIDENCIA PROJECT | ROI

A group of students is gathered around a table, looking at architectural blueprints. One student is pointing at a drawing with a pen. The blueprints show various architectural plans, including floor plans and elevations. A pink and grey water bottle is visible on the table. The text "Seek real-world application early on" is overlaid on the left side of the image.

A row of colorful houses in a community setting. The houses are painted in shades of orange, light blue, teal, and yellow. People are gathered around the houses, some sitting on a concrete wall, some standing. A dog is lying on the ground in the foreground. The scene is outdoors with trees and a clear sky.
