

Pump Systems Matter Mission and Vision:

Pump Systems Matter™ (PSM) places a primary focus on pump systems education and outreach and addresses energy savings and total cost of pump ownership.

Vision:

Pump Systems Matter initiative assists North American pump users gain a more competitive business advantage through strategic, broad-based energy management and pump system performance optimization.

Mission:

To provide the marketplace with tools and collaborative opportunities to integrate pump system performance optimization and efficient energy management practices into normal business operations.

Essential Elements:

- Build awareness of the benefits of systems optimization and pump system life cycle cost at the management, production and technical levels of companies throughout the supply chain.
- Assist the pump industry in building their capacity to deliver system optimization solutions.
- Partner with key groups such as, the energy efficiency community, utilities, engineering consulting firms, pump system users, HI and other associations, and government agencies to strategically support educating, encouraging and creating incentives for end users and trade partners to adopt systems optimization products, services and practices.
