PRESIDENTIAL PERMIT

AUTHORIZING THE

BONNEVILLE POWER ADMINISTRATOR

TO CONSTRUCT, OPERATE AND MAINTAIN

ELECTRIC TRANSMISSION FACILITIES

AT THE INTERNATIONAL BORDER BETWEEN

THE UNITED STATES AND CANADA

(FEDERAL POWER COMMISSION-DOCKET NO. IT-5959)

By virtue of the authority vested in me as President of the United States and by reason of the acceptance of the provisions, terms and conditions hereinafter specified, permission is hereby granted to the Bonneville Power Administrator, having his principal office at Portland, Oregon (hereinafter referred to as the "Permittee") to construct, operate and maintain electric transmission facilities described in Article 2 below, at the international border between the United States and Canada near Elaine, Washington, for the transmission of electric energy between the United States and Canada as set forth in the application for Presidential Permit filed with the Federal Power Commission (hereinafter called the "Commission") on July 27, 1945, as supplemented July 28, 1945, pursuant to the provisions of Executive Order No. 8202 dated July 13, 1939 and the rules and regulations of the Commission.

Article 1. It is expressly agreed by the Permittee that the facilities herein described shall be subject to all conditions, provisions, and requirements of this permit; Permittee agrees

that this permit may be terminated at the will and pleasure of the President of the United States with or without cause; and that it may be amended by the President of the United States upon proper application therefor.

Article 2. The facilities covered by and subject to this permit shall include, in addition to the following, all lands and supporting structures within the rights-of-way occupied by such facilities:

one three-phase line operating nominally at 230 kv, 60 cycles, located at the international border near Blaine, Washington;

which facilities are more specifically shown and described in the application. No substantial change shall hereafter be made in the facilities and operations authorized by this permit until such change shall have been approved by the Commission.

Article 3. The construction, operation and maintenance of the aforesaid facilities shall be subject to the inspection and approval of the District Engineer, Corps of Engineers, United States Army, in charge of the District affected herein and a representative of the Commission, both of whom shall be authorized representatives of the United States for such purposes. The Permittee shall do everything reasonably within its power to prevent or suppress fires on or near the lands occupied under this Permit.

Article 4. In the construction, operation and maintenance of the facilities herein specified, the Permittee shall place and

maintain suitable structures to reduce to a reasonable degree the liability of contact or inductive interference between its transmission line and any other facilities not owned by the Permittee.

Article 5. Permittee agrees to file with the Commission, under oath and in such detail as the Commission may require, such statements or reports with respect to the energy transmitted or the facilities authorized herein, as the Commission may, from time to time, request. Such information may be made available to any Federal, State, or local agency requesting such information.

Article 6. The facilities herein authorized shall not be operated so as to impair the sufficiency of electric supply within the United States unless specific authorization therefor shall be obtained.

Article 7. Permittee agrees to comply promptly with any regulations or instructions affecting the facilities, or any part thereof, covered by this permit which may be issued by the President of the United States or any government department or agency of the United States for the aid and protection of aerial navigation.

Article 8. Neither this permit nor the facilities, or any part thereof, covered by this permit shall be transferable or assignable. The Permittee shall maintain the facilities, or any part thereof, in a condition of repair for the efficient operation of said facilities in the transmission of electric energy, and shall make all necessary renewals and replacements.

Article 9. Upon the termination, revocation or surrender of this permit the facilities including the supporting structures herein authorized shall be removed within such time as the Commission may specify and at the expense of the Permittee. Upon failure of the Permittee to remove such facilities or any portion thereof, the Commission may direct that possession of the same be taken and the facilities removed at the expense of the Permittee.

IN WITNESS WHEREOF, I, Harry S. Truman, have hereunto signed my name this 27 day of October, 1945, in the City of Washington, District of Columbia.

s/ Harry S. Truman  
President of the United States

IN TESTIMONY OF ACCEPTANCE of all the provisions, conditions, and requirements of this permit, the Permittee this 31st day of October, 1945 has caused its name to be signed hereto.

UNITED STATES OF AMERICA  
Department of the Interior

By s/ Paul J. Raver  
Bonneville Power Administrator

Executed in triplicate
