PERMIT AUTHORIZING  
 BONNEVILLE POWER ADMINISTRATION  
 TO CONSTRUCT, OPERATE, MAINTAIN AND CONNECT  
 ELECTRIC TRANSMISSION FACILITIES  
 AT THE INTERNATIONAL BORDER BETWEEN  
 THE UNITED STATES AND CANADA

(Federal Power Commission - Docket No. E-7170)

Bonneville Power Administration (hereinafter referred to as Permittee), an agency of the United States, with its principal office at Portland, Oregon, in an application filed in the above docket on June 23, 1964, requested permission, pursuant to Executive Order No. 10485, dated September 3, 1953, to construct, operate, maintain and connect at the international border between the United States and Canada the facilities described in Article 2 below for the transmission of electric energy between the United States and Canada.

The Secretary of State by letter dated AUG 14 1964, and the Secretary of Defense by letter dated JUL 31 1964 favorably recommended that the Permit be granted herein as hereinafter provided.

Upon consideration of this matter, the Commission finds that the issuance of a Permit as hereinafter provided is appropriate and consistent with the public interest.

Pursuant to the provisions of Executive Order No. 10485, dated September 3, 1953, and the Commission's Rules and Regulations thereunder, permission is hereby granted to Permittee to construct, operate, maintain and connect the electric transmission facilities described in Article 2 below at the international border between the United States and Canada.

Article 1. The facilities herein described shall be subject to all conditions, provisions and requirements of this Permit. This Permit may be modified or revoked by the President of the United States or the Federal Power Commission, and may be amended by the Federal Power Commission on proper application therefor.

Article 2. The facilities covered by and subject to this Permit shall include:

a three-phase 230 kv transmission line, supported on steel towers, located at the international boundary near Nelway, British Columbia, Canada, where it will be interconnected to facilities of West Kootenay Power and Light Company Ltd.

Article 3. The operation, maintenance and connection of the aforesaid facilities shall be subject to the inspection and approval of the Division Engineer, Corps of Engineers, United States Army in charge of the district affected herein and a representative of the Commission, both of whom shall be authorized representatives of the United States for such purposes. The Permittee shall allow officers or employees of the United States showing proper credentials free and unrestricted access into, through and across any lands occupied by said facilities in the performance of their official duties.

Article 4. In the operation, maintenance and connection of the facilities herein specified, the Permittee shall place and maintain suitable structures to reduce to a reasonable degree the liability of contact or inductive interference between its transmission facilities and any other facilities not owned by the Permittee.

Article 5. If, in the future, it should appear to the Secretary of the Army that any facilities or operations permitted hereunder cause unreasonable obstructions to the free navigation of any of the navigable waters of the United States, the Permittee may be required, upon notice from the Secretary of the Army, to remove or alter such of the facilities as are owned by it so as to render navigation through such waters free and unobstructed.

Article 6. Permittee shall comply promptly with any regulations or instructions affecting the facilities, or any part thereof, owned by it and covered by this Permit which may be issued by the President of the United States or any Government department or agency of the United States for the aid and protection of aerial navigation.

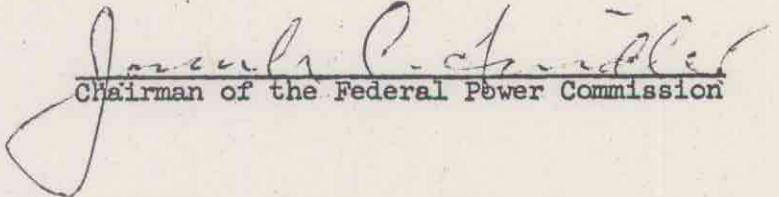

Article 7. Permittee shall do everything reasonably within its power to prevent or suppress fires on or near any land occupied under this Permit.

Article 8. Permittee shall install and maintain adequate metering equipment to measure the flow of all electric energy transmitted from the United States to Canada, pursuant to the authority herein granted; shall make, keep and preserve full and complete records with respect to the movement of such energy; and shall furnish in triplicate, reports annually, on or before February 15, showing for each month of the preceding calendar year, the gross kilowatt-hours of electric energy received and delivered, the maximum kilowatts of transmission, and the consideration therefor.

Article 9. Neither this Permit, nor the facilities, or any part thereof covered by this Permit shall be transferable or assignable. The Permittee shall maintain the facilities or any part thereof in a condition of repair for the efficient operation of said facilities in the transmission of electric energy, and shall make all necessary renewals and replacements.

Article 10. Upon the termination, revocation or surrender of this Permit, the facilities including the above structures herein authorized shall be removed within such time as the Commission may specify and at the expense of the Permittee. Upon failure of the Permittee to remove such facilities or any portion thereof, the Commission may direct that possession of the same be taken and the facilities removed at the expense of the Permittee.

IN WITNESS WHEREOF, I, Joseph C. Swidler, have hereunto signed my name this 3rd day of September 1964, in the City of Washington, District of Columbia.

  
Chairman of the Federal Power Commission
